Doctor Patient Portal

Abstract:

The Doctor-Patient Portal is a user-friendly web platform developed in PHP to streamline and enhance healthcare accessibility. This portal addresses the challenges faced by patients who spend hours in long queues for doctor appointments in clinics or hospitals. By offering a free lifetime membership for both patients and verified doctors with a good reputation, the portal ensures trustworthiness and reliability. Key features include personalized dashboards for managing appointments, a direct messaging system for health advice or precautionary consultations, and the promotion of digital healthcare practices to reduce paperwork. The Doctor-Patient Portal is a significant step toward digitalizing healthcare services in India, improving efficiency, and fostering a seamless connection between patients and doctors.
